is a Shareware software in the category . Manufacturer Category Customer reviews Jan 29, 2014 can only print to the default directory on the hard drive Sep 13, 2013 does not work on windows 8 Oct 15, 2012 Have a problem with

PhotoPrint Server, work order
54720031 Oct 16, 2012 It is not
very user friendly, keeps asking you
to update the driver, your always
prompted to do this when it is
already up to date. Also there is no
uninstall program. Oct 19, 2012 The
problem is that the customer can
only see to one folder, and in my
case I cant see the directory that I
want. Oct 19, 2012 Works great,
exactly as advertised. I like the fact
that it automatically stores the files
in the server's secure directory, as
the web admin can then access them

to preview or modify them. Oct 19, 2012 The customer, is not able to print to the secure directory, although he is able to print to other folders. Oct 21, 2012 The server is refusing to read the Windows 8 upgrade. I have a new computer, and I thought I would give it a try. Now it can't print to any location on my computer. Very disappointing. Oct 23, 2012 I do not understand this product. I have it installed and working with a scanvec (i.e. 5) printer (i.e. Epson). I have now tried and set up this server to connect to

the same scanner as I have my deskjet printer (I've not installed the scanner yet) and I cannot print. The server has it's own directory which I am told is secure, but it does not allow me to see that directory or locate it on my hard drive. This is not what the product is supposed to do. Oct 24, 2012 My user is not allowed to print. The server is connected to a non-unified Windows 7 computer. The product says you need Windows Vista or later. I have the latest OS and it won't print. What a joke. This

program is awful. Oct 25, 2012
Simple, straightforward and useful.
My boss was able to print a very
large group photo from his Vista
computer over the web using this
program. Oct 27, 2012 The
product's only function is to
